# "HOW MANY HOURS SHOULD I SPEND ON STUDY AND HOMEWORK?" 

How many points do you need in your LC?

|  |  | $>570$ | $\begin{gathered} 570>x \\ >500 \end{gathered}$ | $\begin{aligned} & 500>x \\ & >450 \end{aligned}$ | $\begin{gathered} 450> \\ x>400 \end{gathered}$ | $\begin{aligned} & 400>x \\ & >350 \end{aligned}$ | $\begin{aligned} & 350>x \\ & >300 \end{aligned}$ | etc |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $<50$ | 3 | 2.5 | 2 | 1.5 | 1.5 | 1.5 | 1.5 |
|  | $\begin{aligned} & 100> \\ & y>50 \end{aligned}$ | 4 | 3 | 2.5 | 2 | 2 | 2 | 2 |
|  | $>100$ | 4-5 | 4 | 3 | 3 | 3 | 3 | 3 |

Notes:

1. The numbers in the middle of the table are total hours per day for homework and study
2. If you haven't been studying consistently, you will likely need to do more to catch up
3. If you feel that the homework you are given isn't helpful, you will have to adjust for it by adding more study time
4. Don't count grinds/other classes as study time
5. People are different. Some students will get away with a lot less, some will need a lot more.

## Example:

you got 580 in your most recent set of exams, which were summer exams in 5th year. You need 610 points in your LC. You need to go up by 30 points in the $>570$ range. Our suggestion is that you spend a total of 3 hours on the study and homework. This could mean 3 hours on Monday, Tuesday, Wednesday and Thursday, off on Friday and 4.5 hours on Saturday and Sunday.
